

BRAINSTORMING IDEATION

Project Title:- Web Phishing Detection

Team members:

Akash Mukherjee-Team Leader

Abhinash Kumar-Team Member-1

Abdul Qadir-Team Member-2

Harsh Kumar-Team Member-3

Akash Mukherjee

Modelling to restrict "redirecting pages" as these URL can be hidden

Intelligent web security gateway to monitor all the possible phishing methods

Analytical juxtapose between legitimate and phishing websites

Abhinash Kumar

Advanced deployment for web phishing detection

Spam repository for maintaining web phishing records

Observation of Time Complexity of loading resources as phished website trends to convey only outlays than legitimate's functionality

Abdul Qadir

Tracing link routes to detect link Manipulation

Identification of Homograph Spoofing by comparing it with legitimate web domain names

To check for Extended link to avoid link shortening as most phished websites do shorten with "bit.ly extension"

Harsh Kumar

Misspelled keywords and unusual modifications in the webpage

Prompting for verification of unrelated credentials

Visual check for secured web protocols such as "https"
